EXPERIENCE

Github: <https://github.com/kenpachi01011>

Volunteered in a small team made of 4 people 2 intermediate 1 senior and me to develop a C++ program for file Recovery

- Allocated an environment on the social media to accomplish an easy and active way for communication between all team members.
- Organized the necessary meeting with the team members to discuss the work and keep track of the progress.
- Wrote the documentation for the project on confluence software to explain what to install and how.
- Coded the bat file to use the environment with Jenkins with no problem.
- Provided a review about the design and informed my teammate that the design was so good.
- Investigated the dependencies of the libraries that the system should have to run the program.

SKILLS

C++, Java , Python , Git , Agile(Jira software) , Good knowledge of algorithms and data structures , Windows 10 , Growth Mindset ,English language , Networking ,, Familiar with : JavaScript , HTML5 , CSS3 ,, PhotoShop ,, Premiere Pro ,, Blender.

Summary /About me

I'm a self-taught Software Developer with one year of experience I love to work in a team and I do believe that having the ability to communicate with the other people is really important and it is as important as Solid Skills because at the end of the day we are working with people so Having a good Soft Skills "Communication" would always be helpful and it could make our life easier and much better.

Technology is Really a life changer , it made a better person out of me and connected me to really awesome people , Technology gave me the ability to create the thing that I wanted as I imagined .

I love to implement amazing ideas and make something practical out of them and get feedback from people so that I can make it better and update it.

I'm a discipline person and I enjoy studying and learning new technologies.

I always make sure to develop my skills every day and practice as much as I could.

Learning something new and investing time to master it is always fun and interesting thing to me.
